MEDIA ALERT

Electric outage planned during reliability work on northern Baraga County power line *Service outage scheduled to begin evening of Oct. 23, continue up to 12 hours*

PEWAUKEE, Wis. – A planned electric service outage will begin on Wednesday, Oct. 23, at 6 p.m. EST and may continue until 6 a.m. EST Thursday, Oct. 24.

ATC's planned outage will enable crews to safely replace four aging electric poles on a 69,000-volt power line to avoid potential unplanned power outages during the winter. The Warden power line runs about 10 miles from north central Baraga Township to the village of L'Anse.

The outage will impact some customers and members served by UPPCO, L'Anse Utilities, Ontonagon REA and Baraga Utilities. Those utilities plan to communicate directly with their customers and members about the outage. ATC works closely with its utility and cooperative partners to determine the date and time for this and any planned outages.

ATC understands power outages are inconvenient and appreciates the public's patience and understanding while we perform this proactive maintenance, which will help it continue to provide safe, affordable, and reliable electric service to the area.

Note to editors: View a map of the work area [here](#). Tips for preparing for power outages are available at [Ready.gov/power-outages](https://www.ready.gov/power-outages).

About ATC

ATC is a Wisconsin-based company that moves energy along the regional electric grid in parts of Wisconsin, Michigan, Minnesota and Illinois, serving more than 5 million electric consumers. We are experts at what we do: planning, maintaining, operating and protecting the grid. As the electric industry moves toward renewable generation sources, we are transforming our system to continue delivering energy reliably and safely. We proudly support STEM education programs that empower youth with the skills needed to succeed in tomorrow's energy workforce.
